

FIELD LINING

We only have 5 paint machines available. After each use, please return them to the soccer shed. All paint will be stored in the shed.

We have White and Orange. If a field is already painted in white then continue painting in white. The Orange would be used if other sports teams are using that field.

The school maintenance department will line all school fields initially. (Probably Mid May) The Perinton Rec. dept also lines the fields at Center Park. After that Field Maintenance is responsible for keeping the lines acceptable. Operations will assign personnel.

Weather conditions and mowing have a huge influence on how often you need to line the fields. The fields need to be re-lined before the lines fade. Starting over having no existing lines is much more difficult.

You will probably share a field with another team. Do NOT assume someone else is taking care of the fields; check the lines on the field before each game.

The League can fine the Fairport Soccer Club if the Fields are not acceptable to the Official.

Nets are put up in the spring and taken down in the fall. (Thanks to all that helped this past weekend!!! It was great!)

If you don't have a shed key, ask your manager. If they cannot provide you one please contact Operations and they will get you a key.

Thanks for volunteering for Field Maintenance.
